Brad,

Wish I had a couple more hours to dig through some more of the literature. Seems like they are thinking a bit more there days. Here are some thoughts literally thrown together.....

On Mon, Jul 13, 2015 at 8:48 AM, Vann, Bradley <Vann.Bradley@epa.gov> wrote:

John,

Per EPA's direction, the parties submitted a work plan addendum to perform additional sampling in both areas 1 and 2. We had directed the additional borings to help tighten up the RIM volume estimates for the partial and full excavation remedial options. Parties have also included additional RIM characterization approved for chasing RIM in Area 1 (or what is RIM rad versus MLFW). All of that is fine; however, they also have included sampling to support the fate and transport modeling (see pages 6 and 7 and tables 1 and 2). Can you take a quick look at those parts and give me your feedback this week by any chance?

Thanks,

Mr. Vann,

Attached please find the Work Plan for Additional Characterization of Areas 1 and 2.
Please let us know if you have any questions or would like to discuss this work plan or any
other aspect of the work at the Site.

Thank-you, Paul
